EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Adam Masia on 27 April 2007.

The application has been amended as follows:

Claim 18, line 16: Replace "Claim 15" with – Claim 1--.

Reasons for Allowance

Claims 1-14 and 16-56 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims in the instant application have not been rejected using prior art because no reference, or reasonable combination thereof could be found which disclose, suggest or teach, a pivotable symbol indicator, comprised within a gaming device, which is positioned adjacent to the symbol display mechanism and attached to the housing, wherein the symbol indicator is operable to pivot towards and away from the plate to indicate atleast one of the symbols of the symbol display members, as discloses in independent claims 1, 21, 38 and 55.

It is noted that the combination of Inoue (US Patent 6,398,220), Wilkins et al. (US Patent 6,793,577) and Perrie et al. (US Patent 6,173,955), which are the closest prior

Art Unit: 3714

art, discloses an outer rotational member that rotates in a clockwise direction and is rotated in a lateral direction of the game machine, the display also includes an inner rotational member that is rotated in a perpendicular direction of the game machine. Thus, the rotational members are rotated in different directions with respect to one another. The outer rotational member includes a plurality of sections, however, the rotation member only includes static nonmoving sections. The reference of Wilkins teaches of a movable indicator and a symbol display having an illumination. However, Wilkins does not teach or suggest a symbol display mechanism including a plate rotatably attached to the housing and a plurality of symbol display members each independently rotatably attached to the plate, or a support rotatably attached to the housing and a plurality of symbol display members each independently rotatably attached to the support. Thus, the prior art fails to teach the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
